Billi™

Originating in Australia, Billi has been at the forefront of the instant filtered boiling and chilled water systems industry for over 30 years. Billi products are celebrated for their combination of functionality, performance and contemporary aesthetics. Proudly Australian-made and designed, Billi products have brought a unique concept of underbench instant filtered boiling, chilled and sparkling drinking water to many countries around the globe.

Manufactured in Melbourne, Australia to strict quality standards, Billi water systems come with an assurance of quality, innovation and sustainability. Incorporating cutting edge eco-technology features and modern designs, Billi delivers solutions that keep pace with the ever-changing needs of its users.

AUSTRALIAN DESIGNED & MADE

All Billi boiling & chilled units are designed and manufactured in Australia.

SPACE SAVING DESIGN

With a focus on space saving, Billi systems have one of the smallest footprints on the market, allowing you to make the most of the valuable underbench space.

ENERGY EFFICIENT

Billi's unique Heat Exchange Technology enables our systems to achieve substantial energy savings. Our units also feature a standby mode which conserves energy by powering down after 2 hours of non-use.

SAFE TO OPERATE

Billi's X series dispensers are supplied standard with a safety switch to lock off access to boiling water where needed. The red lock icon demonstrates when the safety switch is activated. Simply touch the sensor switch to release the lock and activate the boiling water. The dispenser will revert to safety mode after a period of non use.

ECO-INTELLIGENCE TECHNOLOGY

The Billi B5000 & B4000 systems incorporate Eco-Intelligence technology which is a self learning timer allowing the unit to only operate when required. The self learning timer monitors daily usage patterns and even recognises evening and weekend changes in routine to effectively minimise energy consumption.

ICE BANK TECHNOLOGY

Our Ice bank technology has a chilled reservoir where both sparkling and chilled water supply passes through. In doing so, the dispensed water temperature is consistently chilled, also providing a higher level of carbonation.

FRESHER SPARKLING TASTE

The Ice Bank technology allows for consistently lower dispense and storage temperatures and a far greater level of CO₂ saturation. The benefit of having an ice bank technology is that our sparkling water simply tastes fresher & better.

ADJUSTABLE CHILLED TEMPERATURE

A simple adjustable control knob allows the chilled water temperature to be raised to 15°C or lowered to 6°C for perfectly chilled, refreshing drinks. Your desired temperature is reached quickly and maintained efficiently during operation.

ADJUSTABLE SPARKLING LEVEL

Adjust the level of sparkling to suit your taste, with adjustable controls up to 5 bar of CO₂ pressure.

UNLIMITED FILTERED WATER

The Billi B3000, B4000 and Filter Tap ranges all offer a bottomless supply of still filtered water.*

CHOICE OF DISPENSER FINISHES

The Billi range offers a variety of dispenser options including our X series and slimline dispensers in a selection of modern finishes. Site specific tapware is available, including an XL Levered dispenser with red & blue coloured levers and braille pads for vision impaired applications.

COMPLEMENTARY RANGE OF MIXER TAPS

Match the finish of your Billi dispenser with our Standalone Mixer Taps.

ACCESSORIES

Billi has a range of stylish and functional accessories to match your needs including fonts, risers and tubing extension kits.

WORRY-FREE INSTALLATION

Billi's highly experienced professional service technicians can manage the installation of your Billi Unit. Service plans and filter subscriptions are also available to ensure you never have to worry about the maintenance of your unit.

REPLACEMENT FILTERS

All Billi genuine filters come with a digital lockout feature to retain single use integrity and maximum hygiene of your drinking water system. They also have a visual change reminder alarm built into the dispenser display where amber lights will flash repeatedly to indicate it's time to change your filter.

Synonymous with innovation, Billi prides itself on being the leading designer and manufacturer of boiling, chilled, sparkling and still filtered water systems.

Manufactured in Melbourne and in partnership with leading Italian manufacturers, we are uncompromising on quality and dedicated to delivering the most reliable, high performance and stylish products on the market.

The Billi range of products include industry leading technology such as self-locking boiling water safety, ice-bath chilling, space saving underbench footprints and self-commissioning features. This make our units safe and user-friendly for your family, easy to install and energy efficient.

Installing a new Billi product reduces the reliance on disposable plastic bottles which are a significant contributor to landfill & carbon footprint during their manufacturing process. Aside from the environmental benefits, removing plastic bottles from the home also conserves space in the pantry & fridge while providing the ultimate in convenience. Billi also offers a refillable CO₂ service plan to aid in landfill reduction.

Billi's energy saving initiatives include high performance polyethylene insulation to maintain set water temperatures, stand-by mode and eco-intelligence modes as well as thermodynamic heat exchange technology to capture and re-use any waste heat energy.

Reduce your environmental impact & save on energy bills. Billi's filtered water systems offer unique power consumption advantages:

- » Thermodynamic heat-exchange technology recovers and reuses heat energy.
- » High performance polyethylene insulation retains water temperature and saves energy.
- » Stand-by mode conserves power during set non-use periods.

Standard Warranty

All components of the drinking water systems are covered by a 24-month warranty.

Commitment to Quality

A strong commitment to quality is as important to Billi as style, function and innovation. Recognising the importance of reliability to customers, all Billi water systems are manufactured to strict quality standards.

Every system is designed to provide the highest possible standards of efficiency and energy savings.

Certifications

Every Billi drinking water appliance is manufactured under a certified quality control system. They have been tested and comply with all relevant standards.

Billi Eco, Eco Sparkling, Quadra, Quadra Sparkling, Quadra Plus, Quadra Sparkling Plus, Billi Sahara and Sahara Plus systems are tested to and comply with; Watermark license number WM-21525, AS3498.

Billi Alpine and Filter Tap systems are tested to and comply with; Watermark license number WM-21882, WMTS105.

BWT filter models 994051, 99052, 994054, 994055, 994056 & 994060 are tested to and comply with; Watermark license number WM-022902

All Billi systems are also tested to AS/NZS 4020; AS1428 Accessibility Design Requirements. Billi is also ISO 9001 Certified Certificate Number QEC11627.

Billi Eco, Quadra and Quadra Plus products are certified Gold Level under Global GreenTag standards.

Replacement Filters

Periodic replacement of filters is necessary to maintain water quality and ensure optimal health benefits. Genuine replacement Billi filters are available through our website and locally from your approved supplier. Filters **MUST** be replaced every 12 months as a minimum, in some areas or with high usage it is recommended this is increased to a frequency of 6 months.

All Billi genuine filters come with a digital lockout feature to retain single use integrity and maximum hygiene of your drinking water system. They also have a visual change reminder alarm built into the dispenser display where amber lights will flash repeatedly to indicate it's time to change your filter.

To change your own filter please refer to the link provided below, but for true peace of mind and regular maintenance of your system by an expert why not consider one of our Service Plan offerings overleaf such as a 4 year Service Certificate or a Silver Filter plan?

Billi Pre-Filter Range - External Accessory

- Provides additional filtration support while protecting your underbench system investment
- Suitable for standalone use as an inline filter solution to cold water supply
- Compatible with all Billi mixer taps & many other existing tapware manufacturers
- Cost effective solution for mains filtering
- Kit provides everything you need for easy setup. Replacement and upgrade filter options can be purchased separately.

Contact our friendly customer service team to discuss your pre-filtration needs.

Pre-Filter Kit
Part Number 994113

Billi offers the very best in innovation, superior performance and reliability and we back this up with a world class customer service experience ethos. Instant filtered drinking water systems do require service & maintenance and filter replacements to ensure optimal water quality and health benefits.

BILLI INSTALLATION

A Billi accredited technician can offer Standard Installation in residential premises. Standard Installation Requirements regarding water and power supply must be met and does not include installation on granite or natural stone bench tops or bench tops that are more than 48mm thick.

4 YEAR SERVICE CERTIFICATE

All new units are eligible for access to our 'peace of mind plan', that provides 4 years of filter changes and comprehensive service for a fixed annual fee. The Service certificate can be purchased strictly for a period of 60 days from delivery.

For more information on our service plans, please visit our website www.billi.com.au/billicare-service-plans

SILVER SERVICE PLAN

Filter replacement plan, performed by a Billi accredited technician. Fixed rate for the duration of your agreement.

REFILLABLE CO₂ FILTER PLAN

Billi now offers customers an environmentally friendly option to rent CO₂ & Regulator packages, with a periodic refill service provided to site.

FILTER SUBSCRIPTION

Our DIY offer for the home handy person or on-site maintenance manager. Your chosen filters are delivered to you, within your chosen months for self-installation.

HOW TO CHOOSE YOUR BILLI

What are your water needs?

What design will best suit your kitchen?

Do you need a complementary mixer tap for your Billi Dispenser?

If installation over a sink is not an option, choose a matching font for bench top install.
